## Dividing Perennials in the Fall

A great gardening chore that can be done in fall is the division of your perennials. Not all perennials can or should be divided this time of year but there are a great number that can be. Also not every perennial that can be divided needs dividing. Here are a few great reasons to divide your perennials:

Prevents them from getting to woody in the centre

Encourages new growth

Can prevent them from spreading and becoming invasive

It is cheaper than buying new ones each spring

Also most plants can be left for years before they actually need any dividing they will let you know when it is time usually by dying out in the middle.

- Achillea
- Aconitum
- Aegopodium
- Ajuga
- Amsonia
- Anaphalis
- Anchusa
- Anemone
- Anthemis
- Arenaria
- Armeria
- Artemisia
- Aruncus dioicus
